SUMMARY

A self-taught Web Developer who is helpful, creative, and solution-oriented. My journey began as a hobby in 2022 and quickly grew into a passion, leading me to focus entirely on software development. I have recently enjoyed working with TypeScript, React and Next.js.

WORK EXPERIENCE

Frontend Developer, Merzigo

Feb 2024 - July 2024

Worked on a CMS project, written in React, designed to control dedicated YouTube channels on a single website, streamlining management processes that were previously handled separately on YouTube Studio.

- Implemented new features to enhance user experience, ensuring seamless integration with existing functionalities.
- Maintained and updated outdated code and libraries to improve performance and security.
- Experienced agile methodology, participating in regular sprints and collaborative team meetings to ensure efficient project management.

PROJECTS

Learnification

Jul 2023 - Aug 2023

Collaborated with a team of four to develop a dynamic Learning App in the final project of the Recoded Bootcamp

- Utilized React with Next.js for leveraging Server Side Rendering
- Implemented Next-Intl for internationalization, Next-Auth for authenticating users, AWS Cloud for storing pictures, MongoDB for storing users and courses

Turkish Dictionary

Jun 2024 - Present

Turkish Dictionary aims to be an open-source website where people can search and save words, and contribute to Turkish.

- Utilizing T3-App tech stack, next-intl, and PostgreSQL with Drizzle-ORM
- Implemented the latest Next.js features like Streaming and PPR
- Incorporated uploadthing to store images and pronunciations.

SKILLS

- TypeScript, C#
- React, Next.js
- TailwindCSS, SCSS
- .Net, Node.js
- PostgreSQL, MongoDB
- Docker

EDUCATION

Front End Web Development Bootcamp, Re:Coded

Mar 2023 - Sep 2023

A bootcamp that emphasizes teamwork and self-learning, providing skills in frontend development and fostering personal growth as a team member.

- Completed Flatiron School courses to improve soft skills like communication in business, providing feedback and more.

Industrial Engineering, Abdullah Gül University

Oct 2020 - July 2022

- Completed English prep school successfully first year.
- Used to be a member of various student clubs like Culture and Literature Club. Later on, I shifted my focus to software development.
