SUMMARY

A self-taught Web Developer who loves being helpful, creative, and solution-oriented. It all started as a hobby in 2022, then became my passion, and the reason for shifting my whole focus to software development. As an etymology lover, I want to create a new modern and exhaustive online Turkish dictionary and learning platform.

PROJECTS

Leanification

📅 08/2023 - 09/2023

🔗 <https://learn-u-team-7.vercel.app/>

Successfully collaborated with a team of four to develop a dynamic Learning App in the capstone project of the Recoded Bootcamp

- Utilized React with Next.js for leveraging Server Side Rendering
- Implemented [the git workflow](#), GitHub projects for task management and Agile Methodology commonly used by devs
- Implemented Next-Intl for internationalization and Next-Auth for authenticating users
- Used AWS Cloud for storing pictures, MongoDB and Mongoose for storing users and courses
- See the [GitHub repository](#) for more

Turkish Dictionary

📅 06/2023 - 07/2023

🔗 <https://turkish-dictionary-client.vercel.app/>

Created a new dictionary website by integrating the official TDK dictionary API, addressing key feature gaps through the incorporation of client-side routing with Angular 16.

- Gained expertise encompasses Angular Routing
- Implemented HTTP Interceptors for caching
- Creation of dynamic Dark-Light Mode Theme with accompanying animations
- See the [GitHub repository](#) for more

SKILLS

Technical

Asp.NET WEB APIs	Node.js	Express.js	Angular	Next.js	React	C#	TypeScript	JavaScript
HTML	CSS	SCSS	Tailwind	Bootstrap	MsSql	MySql	Entity Framework 7	Prisma
MongoDb	SOLID	MVC	Onion Architecture	Docker				

Soft

Self-motivated	Continuous learner	Pays attention to details	Team worker
Gives constructive feedbacks	Able to work under pressure	Time management	

EDUCATION

Front End Web Development Bootcamp

Re:Coded

📅 03/2023 - Present

- A bootcamp that emphasizes teamwork and self-learning, providing skills in frontend development and fostering personal growth as a team member
- The repo of the projects I built during the bootcamp: [Frontend-Projects](#)

EDUCATION

Industrial Engineering

Abdullah Gul University

📅 09/2020 - 07/2022

- Completed English prep school successfully first year.
- Used to be a member of various student clubs. Later on, I shifted my focus to software development.
